

QU-32

DIGITAL MIXER

The Qu digital mixer series is designed to be simple for any user to operate.

Qu-32 has 32+1 faders in 3 layers, 32 mono & 3 stereo DSP channels, plus 4FX units with their own dedicated return, resulting in a total of 46 processing channels. 4 Mono and 3 stereo auxiliaries, 2 stereo subgroups and 2 stereo matrix mix busses are available.

Every function has a dedicated hardware button to complement the touchscreen.

A dSNAKE remote audio port allows connection of AB & AR AudioRacks, as well the ME personal monitor system.

16 Channels of automatic mic mixing, 3 user levels, USB multi-track audio and a customisable fader layout make the Qu-32 a powerful mixer.
