

CS1000 SERIES

Sound Masking / Public Address Light Background Music

8W iCeilings® CS1000 Sound Panel with superior combined performance for background or light music, public address sound masking and active acoustics to enhance privacy, comfort and workplace effectiveness.

CS4000 SERIES

Greater emphasis on Music & Voice Education / Conference Centres Large Rooms

8W iCeilings® 4 Transducer CS4000 Sound Panel provides enhanced output and frequency range performance for AV, public address and active acoustics to enhance privacy, comfort and workplace effectiveness.

Why choose sound panels

- Premium product
- Independently tested by The University of Salford
- Individually tested as standard practice
- Designed to fit an Armstrong suspended ceiling
- Blends with and maintains a seamless ceiling finish
- Reduces ceiling clutter associated with conventional speakers
- Fills room with a wide and even spread of sound

Available complete with an Armstrong Microperforated Tile fitted or alternatively as a cassette for fitting on site to the existing Microperforated Tile.

The iCeiling Sound Panel is perfect for new builds and retrospective fitment.

Intelect does not specify, that is typically a specialist role of an AV Dealer / Installer.

Save with reduced installation time

- 'Drop-in': Connect
- No drilling: no mess: no dust
- No need to carry stock: deliveries can be made directly on site
- Minimise handling: Maximise profit
