AUDAC introduces the column speaker "KYDO", an all-round column speaker with an extraordinary sound and a surprisingly high power.

The KYDO is designed to be used in all applications where audibility of music and speech is very important, like auditoria, churches, meeting and board rooms, etc.

It features a single 6 x 2" speaker section which can be set to different power taps, with a recessed adjuster screw behind the front cover.

The different power tabs for 100V are:

- 20 Watt @ 100V
- 10 Watt @ 100V
- 5 Watt @ 100V
- 2.5 Watt @ 100V

There's also an 12 Ohm option, which is controllable by an internal switch inside the speaker, so it can not be switched to 12 Ohm accidentally

The KYDO features an aluminum housing, making it a light weight column speaker of approximately 2,5 Kg.

For mounting the AUDAC KYDO, a specially designed wall bracket is included, which makes it possible to focus the speaker in any direction, to obtain the best possible audibility.

Available in white (KYDO/W) and black (KYDO/B).
