VOICE

Audio installations for speech reproduction like for house of worship - or corporate boardroom applications typically do not require sub frequency reinforcement, however subwoofers are offered for the CURV installations where sub frequencies are needed. The **CURV 500[®]** system's **I AMP** provides delay compensation per channel to ensure maximum speech intelligibility, imaging and sound quality throughout the installation.

Power amplifiers	3 × LDADA12K4
Patchpanel size	3U Audio (Neutrik connectors)
Rack	12U, Double slide-in door, shockmount
Total power	32.4 kW
Presets	34 × MAILA presets for flying & ground-stack applications
Power distribution	32A In/Daisy chain - 6 × Schuko out, 3 × circuit breakers, 3 × digital voltage / current meters

ArmoniaPlus

SYSTEM MANAGER SOFTWARE BY POWERSOFT

- MAILA "Quick Setup App" converted into ArmoniaPlus presets (incl. splay angles, rigging height, pickup points)
- 70+ manufacturer EQs covering 300 MAILA configurations
- MEQ based on MAILA Auto EQ, compensating speaker coupling and air-loss over distance
- Seamless integration with LD Systems ADA amps

MAILA® APP FOR FAST SETUP

- **Room simulation:** Automatic EQ adjustment and calculation of the splay angles
- **Pre-planning:** Optimal preparation in advance, no matter when and where
- **10 Band EQ Presets:** Create custom 10-band parametric EQ presets
- **Delay lines:** Easy delay line configuration based on distance and temperature

TICA[®] SERIES

TOOLS FOR INTEGRATING COMMERCIAL AUDIO

Flexible and affordable professional audio solutions. The TICA series offers a versatile range of products that seamlessly integrate in both smaller and larger audio setups. TICA stands as a testament to thoughtful engineering, enabling users to customize their audio systems by mixing and matching components to meet specific needs. Experience unparalleled flexibility and exceptional features without breaking the bank with the TICA Series.

DESIGN & MANAGEMENT SOFTWARE FOR NETWORKED INSTALLATION SOLUTIONS

Meet QUESTRA - the design and management software for networked LD Systems installation solutions. QUESTRA enables a streamlined configuration of LD Systems devices and the design of custom user panels that can be controlled on both Windows computers and Android or iOS portable devices.

 for Windows

 for control panels

WHAT IS QUESTRA® ?

With QUESTRA you gain access to the full DSP capabilities of LD Systems' audio installation devices. It allows you to configure audio networks, small and large, but also to manage every single device and control it from a single application.

PLANNING A PROJECT

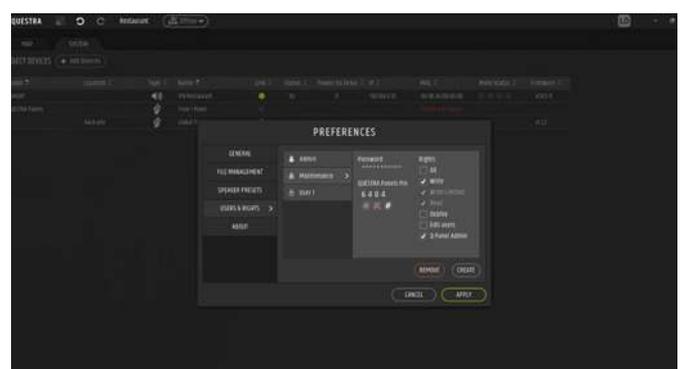

Plan and prepare system configurations right from early stages of your install project - even before installing any hardware on site. Quickly create end-user interfaces to demonstrate to customers before they buy. With QUESTRA you're in pole position to win that next pitch.

PROJECT DEPLOYMENT

Deploying your new system is just a few clicks away. Simply upload your offline configuration to all the online devices on the network, fine-tune the project and device settings and you're done. QUESTRA makes your work easier with its intuitive User Interface, clearly structured menus and quickly accessible settings.

PROJECT ADMINISTRATION

QUESTRA puts you in control of all your installation projects. Create users, assign specific roles, limit the access to certain functions and ensure critical network settings cannot be modified. Easily create and manage device presets for different user applications for users to trigger using QUESTRA Panels. With remote access, you can monitor your installation and provide maintenance from anywhere, at any time.

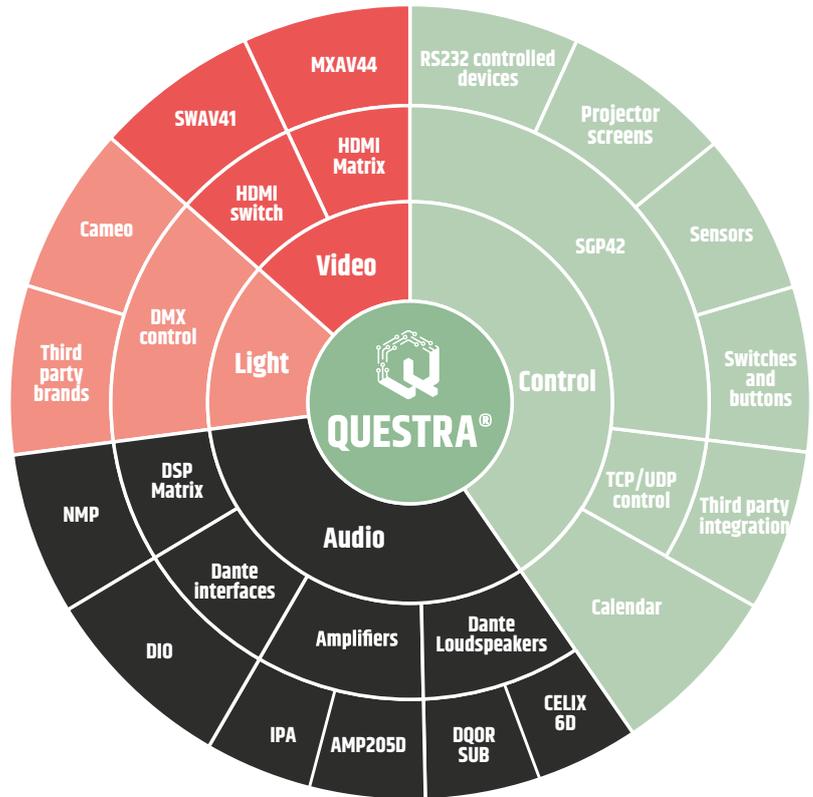

QUESTRA® UPDATE V 1.4

INTEGRATION OF THIRD-PARTY CONTROL AND AUTOMATION

Features

- Native control of the latest LD Systems AV and I/O devices on a single platform.
- OSC has been added as a control protocol, as well as TCP/UDP/HTTP with JSON, ASCII and binary
- Virtual devices turn custom logic into reusable third-party device drivers, both online and offline
- Advanced discovery with mDNS, multicast and IP/MAC matching, plus bi-directional status communications
- Community-driven and future-proof platform: Create, share and reuse devices across AV ecosystems

IMA[®] SERIES

INSTALLATION MIXING AMPLIFIERS

Your permanent audio installations require solutions that on the one hand blend discreetly into the background and on the other hand are highly flexible and versatile in their functions. You need to be able to connect different audio sources and manage them, to mute non-priority signals during announcements or emergency calls.

With the IMA-Series, LD Systems presents an all-in-one mixing amplifier-series, which leaves nothing to be desired in terms of quality, design and flexibility. Seamless integration for industrial and commercial applications thanks to the 9.5-inch housing design, a wide range of connectivity options including Bluetooth[®] for wireless audio connection and a multistage priority circuit are just some of the benefits the IMA Series offers. And best of all, the IMA-Series products, are designed to be intuitive and easy to use for everyone.

Line input for emergency signal with contact closure

Switchable chime feature in Mic/Line 1 channel

4 priority levels for comprehensive integration options

Balanced AUX line output with Music-Mix switch

Switchable auto standby mode for reduction of energy consumption

Intuitive control panel design with capacitive controls for selecting music source and Bluetooth[®] pairing

IPA SERIES

INSTALLATION POWER AMPLIFIERS

Whether in hotels, schools, houses of worship or airports, the future is audio solutions that grow and adapt to new conditions. The IPA Series DSP-based installation amplifiers offer four-channel, powerful class-D power amplifiers with direct access to the most typical basic DSP controls. The IPA Series is already prepared for remote operation with the future remote panels and paging microphones from LD Systems. An additional expansion slot guarantees a high level of future-proofing. The configuration of the IPA installation amplifiers is even more flexible thanks to the optional Ethernet card, for example when the room layout is changed or when there are fluctuating numbers of attendees. The Ethernet & Dante® card also offers Dante audio networking capabilities in order to transmit high quality, uncompromised audio with almost no latency via a standard IP network. This solution guarantees access to a wide range of Dante®-enabled devices for all conceivable applications.

MODERN RESTAURANT PA

LD Systems in the Amza Restaurant

Open - that's how you might describe the Amza restaurant in Sibiu, Romania, in just one word. Over a hundred tables in a large, spacious dining area, an open kitchen, floor-to-ceiling windows, and lots of wood and plants. Amza's operators have created a thoroughly modern restaurant concept. Their AV service provider, SET-UP, chose a combination of the LD Systems CURV 500 and DQOR speaker series to provide sound for the restaurant's acoustically challenging environment.

5-STAR SOUND

LD Systems at the Tyrolean luxury hotel "Das Central"

Between Tyrolean tradition and the alpine lifestyle, at the 5-star hotel "Das Central" in Sölden, Tyrol, guests will find everything they expect from a perfect alpine holiday. For the multi-zone sound system in the various indoor and outdoor areas, the integrator responsible - Wilderness Studios - opted for a lean LD Systems setup based on the QUESTRA design and management platform. The installation at "Das Central" comprises a total of six audio zones: in addition to the Summit Skybar including outdoor terrace, pool area and pool terrace, a large relaxation and wellness area on the upper floor and the lobby are also equipped with various LD Systems series. For the indoor areas, the CURV 500 miniature arrays were chosen as standard, some of which were supplemented by CURV 500 I SUB subwoofers. For the outdoor areas, the team chose the IP55-certified installation speakers from the LD Systems DQOR series.

A LOOK BEHIND THE MASK

LD Systems at immersive Broadway musical "The Masquerade" in New York

Since July 2025, the immersive new production of Andrew Lloyd Webber's famous "Phantom of the Opera" has been wowing Broadway audiences in New York. Under the direction of Tony Award winner Diane Paulus, the audience not only watch (and listen), but also immerse themselves in the action: in a multi-storey former department store in the centre of Manhattan, visitors move between large and small rooms, changing stage scenes, characters and ever-changing soundscapes. The latter are brought to life by more than 1,000 permanently installed loudspeakers from LD Systems, which have been seamlessly integrated into the opulent, detailed sets. But how is it possible to create clear, immersive soundscapes in such a complex room layout?

MULTI-ZONE AUDIO SYSTEM

LD Systems at ARCA Resort in Romania

If you want to eat particularly fresh fish in Romania, you can't avoid the ARCA Resort. Located directly at a large fish pond, the owners of ARCA run a high-quality fish restaurant with its own fish farm. But the building complex offers its guests much more than that: weddings and corporate events, tiny houses on the shore of the lake and a park with playgrounds and sports fields for children and adults. In order to provide the multifunctional location with audio signals as flexibly as possible, integrators Direct Sound took advantage of the extended closure period during the COVID pandemic to install a multi-zone audio system based entirely on LD Systems solutions.

About our **mission.**

RELIABILITY

Regardless of which concert or event, whether on stage or at a conference, you have to instinctively be able to rely on your sound system. That's why LD Systems continues to pride itself on delivering high-quality materials and long-lasting workmanship.

SOUND PERFORMANCE

Product developers at LD Systems take great care to ensure that the sound you've got in mind becomes a reality. From tweeters to subwoofers, or from mobile PAs to installed systems, our goal is to always represent the latest state of sound technology.

USER-FRIENDLINESS

LD Systems puts the user first, meaning that simple, intuitive, and efficient operation is already factored in at an early stage during development. From ergonomic handles to easily readable LED displays.

DESIGN LANGUAGE

Thanks to its design-award-winning design language, LD Systems products are not only a pleasure to be heard but a beauty to behold. The unmistakable LD Systems Angle, for example, is used time and time again and gives products their special look.

PASSION

We are dedicated to achieving excellence with remarkable engineering and measurement capability - like the passion that grips a musician on stage, the engineers and designers at LD Systems are enthusiastic to bring the highest standards in sound and design to our products - **LD Systems engineered in Germany.**
